

Substrakt

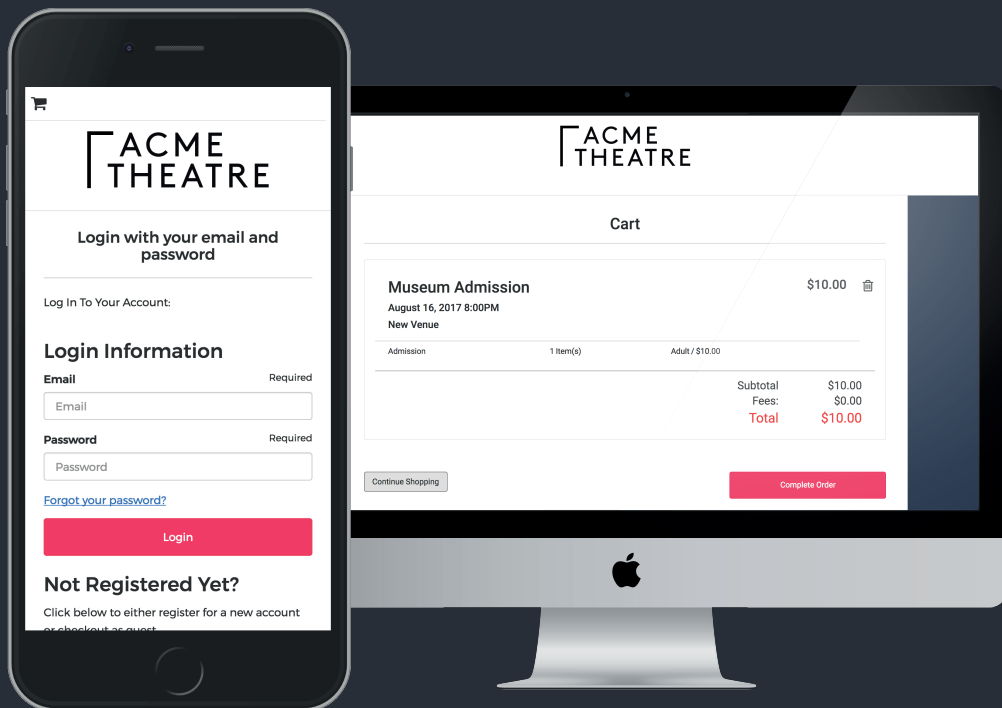

TNEW v7 Templates

We have been working closely with the Tessitura Web Products team and are excited to have been chosen as a partner to deliver customisable TNEW v7 templates for licensees in the Tessitura community so that you can take advantage of all the new v7 features as soon as possible after v7's general release.

Over the page we've outlined the out-of-the-box customisations you will be able to make to our templates when TNEW v7 is released later this year.

substrakt

We are Substrakt. For over a decade we have been making beautiful, effective digital products for organisations in the cultural, heritage and creative sectors.

Our templates:

- have been built and fully-tested on an actual instance of TNEW v7 so you can be sure they will work from the moment you switch them on
- are fully responsive
- adopt a clean, modern approach to design and layout
- are easy to customise with your branding

All of our template also include:

- a range of hosting options for your template assets
- dedicated setup support
- self-service configuration options that enable you to make style changes to your template after the initial go-live
- free Google Tag Manager set up and deployment
- free Google Analytics healthcheck

The following elements in our templates can be customised.
Further customisations can be made if required but will accrue an additional cost.

Page: background colour

Header bar: background colour, logo, navigation content (optional)

Footer: background colour, navigation content

Fonts

Content area: background colour

Buttons: style and colour

We are substrakt.

We make websites and applications for organisations in the arts, cultural, heritage and creative sectors in Europe and North America.

We specialise in ambitious, beautiful and successful projects.

We work on ticketing projects with varying levels of complexity; from styling hosted systems such as TNEW, through to integrations with content management systems and the Tessitura API.

We have worked with Tessitura licensees including:

Website design & build
(WordPress+Tessitura API
integration), TNEW styling

Web application
design & build

Website design & build
(WordPress+Tessitura API
integration), TNEW styling

GRANGE
PARK
OPERA

Website migration and
ongoing support

Website design & build
(WordPress+Tessitura API
integration), TNEW styling

Codebase and website
performance review

TNEW v7 styling and
user-specified
bi-lingual functionality
